Ahmed Samir

Full-Stack Developer | Technical Co-Founder at Meem Langs
Qena, Egypt
+201146615338 ahmedmijdo2@gmail.com LinkedIn GitHub

Summary

Full-Stack Developer with hands-on experience building modern web applications using React, Next.js, TypeScript, Node.js, and database technologies. Experienced in developing responsive user interfaces, implementing authentication, designing data models, and integrating REST APIs. Completed training in NestJS to strengthen backend development skills and expand expertise in building structured, maintainable server-side applications. Technical Co-Founder at Meem Langs, an AI-powered language learning platform, combining software development with product planning, technical coordination, and community leadership.

Projects

Full-Stack Todo Application — July 2026

Next.js, TypeScript, Tailwind CSS, Prisma, MongoDB, Clerk — GitHub | Live Demo

- Developed a full-stack Todo application using Next.js App Router, Server Components, and Server Actions to handle data mutations and application workflows.
- Implemented authentication and route protection using Clerk to manage user sessions and protect application access.
- Designed database models using Prisma ORM with MongoDB for persistent data storage.
- Used Prisma Studio and MongoDB Compass to inspect records, manage data, and troubleshoot database issues.
- Built a responsive user interface with Tailwind CSS and maintained type safety using TypeScript.
- Managed source code and version control using Git and GitHub.

Real Estate Listings Platform — July 2026

Freelance Client Project — Next.js, MongoDB, Prisma — GitHub

- Developed a full-stack real estate platform enabling property owners to list properties for sale or rent and connect directly with potential buyers or tenants.
- Implemented an admin moderation workflow in which submitted listings require approval before publication.
- Built property search and filtering by type, price range, and location, alongside administrative tools for managing listings and archiving sold properties.
- Deployed the application on Vercel with MongoDB-backed data storage.

MijdoOS — Interactive Developer Portfolio — September 2026

React 19, TypeScript, Vite, CSS, Vitest, Playwright — GitHub | Live Demo

- Built an interactive, browser-based desktop environment that presents a personal developer portfolio through a retro operating-system interface.
- Implemented a window management system supporting dragging, minimizing, maximizing, restoring, closing, and window focus management.
- Developed an interactive terminal with 13 commands for exploring profile information, projects, skills, experience, and contact details.
- Structured the application with React and TypeScript, using a centralized state-management reducer and reusable UI components.
- Added responsive layouts, keyboard navigation, accessible controls, and reduced-motion support.
- Implemented automated unit and browser tests using Vitest and Playwright to validate application behavior and user interactions.

Leadership & Experience

Technical Co-Founder — Meem Langs — Nov 2025 – Present

AI-Powered Language Learning Platform

- Contribute to the technical development and product direction of an AI-powered language learning platform.
- Participate in defining product requirements, application structure, technical workflows, and long-term development priorities.
- Help organize weekly sessions, workflows, and collaborative activities for the Meem English Community.
- Coordinate with team members to maintain community engagement, organize initiatives, and support platform growth.

Education

Minya University **Sep 2020 – Jun 2025**
Bachelor of Arabic Language *Minya, Egypt*

CS50 — Harvard University (via edX) **2024**
Introduction to Computer Science *Online*

Technical Skills

Languages: HTML, CSS, JavaScript, TypeScript, Sass

Frontend Frameworks & Libraries: React.js, Next.js, Redux, Bootstrap, Tailwind CSS

Backend Development: Node.js, NestJS, Express.js, REST APIs

Databases & ORMs: MongoDB, PostgreSQL, Prisma ORM

Authentication & Data Fetching: Clerk, Axios, TanStack Query

Database Tools: Prisma Studio, MongoDB Compass

Testing: Vitest, Playwright

Developer Tools & OS: VS Code, Git, GitHub, Linux (Ubuntu)

Soft Skills

Leadership & Collaboration: Coordinates tasks, supports collaborative workflows, and works toward shared team goals.

Problem Solving & Adaptability: Breaks down technical challenges into practical solutions and adapts to new tools and technologies.

Time Management & Consistency: Prioritizes tasks and maintains consistent progress across learning and development projects.

Communication: Communicates technical concepts and project requirements clearly in technical and non-technical contexts.

Self-Learning: Continuously develops technical skills through structured learning and hands-on implementation.

Languages

Arabic: Native

English: B2 (Upper-Intermediate)
