SUMMARY

Full-stack developer building complete web applications with Next.js, React, TypeScript, Prisma and MongoDB — from Clerk-secured authentication and validated server actions to accessible, tested interfaces. Technical Co-Founder at Meem Langs, an AI-powered language learning platform, where work spans a Next.js frontend and a NestJS backend with Prisma. Creator of MijdoOS, a browser-based portfolio operating system whose window manager, terminal and accessibility behaviour are covered by 142 unit tests and 348 cross-browser test runs.

PROJECTS

Full-Stack Todo Application

July 2026

Next.js, TypeScript, Tailwind CSS, Prisma, MongoDB, Clerk • [GitHub](#)

- Server Components and Server Actions handle todo reads and mutations.
- Clerk authentication with middleware-based route protection; only the sign-in and sign-up routes stay public.
- Zod schemas with react-hook-form validate forms; optimistic UI via `useOptimistic` rolls back when a mutation fails.
- Prisma ORM on MongoDB models per-user todos with completion state.
- Vitest and React Testing Library unit tests cover the validation schemas and the todo table.

Real Estate Listings Platform

July 2026 — Freelance Client Project

Next.js, TypeScript, MongoDB, Prisma, Tailwind CSS, Cloudinary • [GitHub](#) • [Live Demo](#)

- Broker-free listings: owners publish homes for sale or rent and buyers contact them directly by phone or WhatsApp from every listing.
- Admin moderation — new listings stay pending and hidden until approved; a dashboard tracks live inventory and archives sold properties.
- Search and filtering by property type, price range and region.
- Image uploads through Cloudinary; serverless Next.js deployment on Vercel backed by MongoDB via Prisma.

MijdoOS — Interactive Developer Portfolio

2026

React, TypeScript, Vite, Vitest, Playwright • [GitHub](#) • [Live Demo](#)

- Browser-based retro operating system: a window manager on a single `useReducer` — open, close, minimize, maximize, drag and z-order focus — with no router or state library.
- Terminal emulator with a hand-written parser, 13 commands and scrollbar history, answering from the same typed data the windows render.
- Desktop icons drawn as merged SVG rectangles from 16×16 pixel maps — no image assets.
- ARIA roles and live regions, full keyboard operation and reduced-motion support; responsive across desktop, tablet and phone.
- 142 Vitest unit tests plus 348 Playwright runs across Chromium and Firefox; static build of about 87 kB gzipped.

LEADERSHIP & EXPERIENCE

Technical Co-Founder — Meem Langs (Mimeflow)

Nov 2025 — Present

AI-Powered Language Learning Platform

- Build across the platform's full stack: a Next.js student frontend and dashboard on top of a NestJS backend with Prisma.

- Contribute to product and data-model decisions, including CEFR-based level access rules and course, lesson and subscription contracts, recorded as written decision documents for the team.
- Organize and run weekly sessions, workflows and collaborative activities for the Meem English Community, the platform's core user base.
- Coordinate with team members to keep operations flowing and to plan digital initiatives that expand the community's reach.

EDUCATION

Minya University
Bachelor of Arabic Language

Sep 2020 — Jun 2025
Minya, Egypt

CS50 — Harvard University (via edX)
Introduction to Computer Science

2024
Online

TECHNICAL SKILLS

Languages

HTML, CSS, JavaScript, TypeScript, Sass

Frontend

React.js, Next.js, Redux, Bootstrap, Tailwind CSS

Backend & Databases

Node.js, Express, Prisma ORM, MongoDB, Strapi

Authentication & APIs

Clerk, REST APIs, Axios, TanStack Query

Database Tools

Prisma Studio, MongoDB Compass

Testing & Quality

Vitest, Playwright, ESLint

Developer Tools & Deployment

Git, GitHub, VS Code, Linux (Ubuntu), Vite, Vercel

SOFT SKILLS

Leadership & Collaboration

Guides small teams, organizes tasks, and works effectively within a team toward shared goals.

Problem Solving & Adaptability

Breaks down complex challenges into practical solutions and quickly adapts to new tools and frameworks.

Time Management & Consistency

Prioritizes tasks, meets deadlines, and maintains disciplined, reliable output over time.

Communication

Clear and professional in both technical and non-technical contexts.

Self-Learning

Continuously improves technical skills through independent study and hands-on projects.

LANGUAGES

Arabic: Native

English: B2 (Upper-Intermediate)
